

NAIYAR HASNAIN

Java Full Stack Developer

naiyarhasnain77@gmail.com • +91 9798257187 • [Portfolio](#) • [LinkedIn](#) • [GitHub](#) • Bangalore, India

OBJECTIVE

Aspiring Java Full Stack Developer with a solid foundation in software architecture, scalable backend systems, and responsive web applications. Highly motivated to apply strong analytical capabilities and expertise in Java, Spring Boot, Angular, and SQL to engineer high-performance solutions, with a growing interest in applied AI.

EDUCATION

Indian Institute of Technology (IIT), Patna

Master of Computer Applications (MCA)

2025 – 2027

Pursuing

Maulana Azad National Urdu University (MANUU), Hyderabad

Bachelor of Science (B.Sc.) in Computer Science

2021 – 2024

CGPA: 8.82 / 10.0

TECHNICAL SKILLS

Languages:	Java (Core/Advanced), TypeScript, JavaScript, Python, SQL, C/C++
Frontend:	HTML5, CSS3, Bootstrap, Angular, React.js, Redux Toolkit
Backend & Frameworks:	Spring Framework, Spring Boot, Spring Security (JWT), Spring Data JPA, Hibernate, REST APIs, JDBC, Spring AI (learning)
Python & Data:	NumPy, Pandas, Matplotlib
Databases & Caching:	MySQL, PostgreSQL, Redis (In-Memory Data Store), DBMS
Core CS Concepts:	Object-Oriented Programming (OOPs), Data Structures & Algorithms (DSA), Operating Systems, Computer Networks
Dev Tools & Platforms:	Docker, Git, GitHub, Maven/Gradle, IntelliJ IDEA, VS Code, Postman, OpenAPI / Swagger

PROJECTS

ResQGrid (AidLinkX) – Offline-First Disaster Relief Coordination   **Sept 2026**

Tech Stack: Java 21, Spring Boot, Spring Data JPA, MySQL (Amazon RDS), Angular, TypeScript, Tailwind CSS, Docker, AWS Amplify, AWS ECS Fargate

- Offline-First SOS Dispatch:** Resident help requests are queued on-device during network drops and **auto-synced on reconnect**; supports multiple disaster types, special-needs tracking and optional photos.
- Role-Based Workflows:** Separate portals for residents, relief camp workers and coordinators; coordinators triage SOS and supply requests through **Pending** → **Accepted** → **Dispatched** → **Delivered** with validated status transitions.
- REST API & Security:** Built Spring Boot REST endpoints with **filtering, priority views and pagination**, PBKDF2 password hashing, session tokens and global exception handling.
- Cloud Deployment:** Angular frontend on **AWS Amplify**; Dockerised backend on **ECS Fargate** with **Amazon RDS MySQL**.

PawBridge – Edge-AI Dog-Request Detector  **Sept 2026**

Hackathon: Claude Build Day, Bengaluru (team of 4) · **Tech Stack:** ESP32-H2, Ultrasonic & MPU6050 sensors, 16×2 LCD, Claude Opus + Haiku multi-agent system

- 48-Hour IoT Build:** A device that notices when a dog *may* want something – ultrasonic trigger, motion sensor, buzzer and LCD; shipped with a live dashboard and **72 passing tests**.
- Multi-Agent AI:** An orchestrator (**Claude Opus**) sends video frames and an audio spectrogram to vision and audio agents (**Claude Haiku**) in parallel; trigger-to-answer in **~17 s**.
- Honest, Evidence-First Output:** Every result shows its evidence and a **confidence score**; answers must start with “possible”, and local rules keep the device working offline.

Sports Center – Full-Stack E-Commerce Platform 

Tech Stack: Java 21, Spring Boot, Spring Security (JWT), React.js, TypeScript, MySQL, Redis, Docker

- End-to-End E-Commerce Flow:** Product catalog with **multi-criteria filtering**, search, pagination and persistent order checkout; REST endpoints documented with **OpenAPI / Swagger**.
- Security & Caching:** **JWT authentication** with role-based access and BCrypt hashing via Spring Security; **Redis** caching for basket state to cut database load.
- Modern Frontend:** Responsive UI in **React.js, TypeScript, Redux Toolkit** and Material-UI with light/dark theming; **Spring Data JPA & Hibernate** for persistence.

CERTIFICATIONS

- Programming using Java** – Infosys Springboard 
- Essential Gen AI Certificate** – Google 

STRENGTHS

- Problem-Solving, Strong Logical & Algorithmic Thinking, Fast Learner, Self-Motivated, Team Collaboration
